## Foreword

- F.1 The Employment Land Availability Assessment (ELAA) is an evidence base and monitoring document which will be published annually as part of the Council's suite of monitoring documents. The ELAA assists in identifying sites which could have the potential for employment development and estimates their potential capacity in terms of uses and floor space. The ELAA also considers those sites which are allocated through the Local Plan and/or have planning permission for employment uses.
- F.2 This edition of the ELAA covers the period between 1<sup>st</sup> April 2022 and 31<sup>st</sup> March 2023. The ELAA will be updated annually alongside the Strategic Housing Land Availability Assessment (SHLAA), Authority Monitoring Report (AMR) and Five Year Housing Land Supply Position Statement, as part of the District Council's suite of monitoring documents.
- F.3 The ELAA forms part of the evidence base for the production of the Local Plan. The policies and proposals within the Local Plan relating to employment development will be based on a range of evidence and considerations of which this assessment is only one.
- F.4 A map showing all the individual sites is available on the website [www.cannockchasedc.gov.uk](http://www.cannockchasedc.gov.uk). The map splits the sites into 2 different categories:
- F.5 **Readily Available:** Sites that are assessed to be suitable and available for development and that development will be achieved in either the short-medium term or medium to long term.
- F.6 **Not Readily Available:** Sites that are assessed to be not suitable or available for development. This category is split into Not Readily Available – Green Belt and AONB Sites and Not-Readily Available – Restricted and Excluded Sites.

### ELAA Disclaimer

The inclusion of a site in this assessment does not indicate that it will be allocated or successfully obtain planning permission for a particular use. Similarly, the none-inclusion of a site in the assessment does not in any way preclude future development, providing it meets the planning policy framework that exists at the time a site comes forward.

## 1. Introduction

- 1.1 National Planning Practice Guidance (PPG) outlines the purpose of a land availability assessment which is to identify a future supply of land that is suitable, available and achievable for housing and economic development uses over the plan period. Assessments for housing and economic land availability may be carried out as part of the same exercise to ensure consistency.
- 1.2 This Employment Land Availability Assessment (ELAA) is undertaken alongside the Council's Strategic Housing Land Availability Assessment (SHLAA). Whilst they are published as separate documents (with slightly different methodologies to reflect the nature of the land requirements being assessed) the SHLAA and ELAA are undertaken simultaneously to provide a comprehensive and consistent assessment of land availability across the District.
- 1.3 The ELAA is an evidence base and monitoring document with a key role in identifying sites that have the potential for employment development. It uses a variety of sources and assesses sites against a largely nationally set criteria to help inform decisions on the overall supply and likely geographical distribution of employment developments across the District. It also serves to monitor the ongoing take-up of sites and supply of future sites, helping to inform local planning policy and development management responses.
- 1.4 The assessment does not in itself determine that a site should or should not be allocated for employment development, but it is important in the plan-making process and helps to inform the Local Plan. It is the role of the Local Plan to determine which specific sites are to be allocated for employment purposes. The inclusion/exclusion of a site in the ELAA does not determine the possibility of planning permission being granted or refused for development, unless the site in question has already been granted permission. All future planning applications will continue to be determined against the development plan and material planning considerations.
- 1.5 The ELAA supports the Authority Monitoring Report (AMR) process, including monitoring against Local Plan requirements. It covers the period from 1<sup>st</sup> April 2006-31<sup>st</sup> March 2023, in line with monitoring completions from the Local Plan (Part 1- 2014) base date of 2006. The Local Plan (Part 1) was adopted in 2014 and Policy CP8 sets out a requirement for a minimum of 88ha of new and redeveloped employment land (primarily for non-town centre B class uses but with flexibility for other uses, where appropriate) up to 2028. There are separate targets for town centre uses, which are not the explicit focus of this ELAA. However, town centre sites are monitored as part of the process.
- 1.6 In 2019/20 the Council undertook a review of its ELAA methodology in line with the updated PPG and to reflect that the Council is in the process of undertaking a Local Plan Review. A further update has been made to reflect

the 2020 update to the Use Classes Order. In line with the update the ELAA will reference E(g) (former B1) uses, and the continued B2 and B8 uses.

- 1.7 The PPG identifies that the area selected for the assessment should be the plan-making area, which in this case is Cannock Chase District.
- 1.8 The National Planning Practice Guidance states that the assessment should:
  - identify sites and broad locations with potential for development;
  - assess their development potential; and
  - assess their suitability for development and the likelihood of development coming forward.
- 1.9 The ELAA should produce the following standard outputs:
  - a list of all sites or broad locations considered, cross-referenced to their locations on maps;
  - an assessment of each site or broad location, including:
    - where these have been discounted, evidence justifying reasons given;
    - where these are considered suitable, available and achievable, the potential type and quantity of development, including a reasonable estimate of build out rates, setting out how any barriers to delivery could be overcome and when; and
    - an indicative trajectory of anticipated development based on the evidence available.
- 1.10 The assessment will need to be made publicly available in an accessible form. The PPG sets out a recommended methodology for producing these outputs and for ensuring the assessment is robust. Sites are assessed based upon their suitability, availability and achievability and are then either categorised as being 'Readily Available' or 'Not Readily Available'.
- 1.11 The methodology applied for this ELAA is detailed in the following section. The methodology section is followed by the final evidence base section which details the ELAA results for Cannock Chase District, including a summary of the overall land supply.
- 1.12 In accordance with national guidance the ELAA has been produced following the involvement of a range of stakeholders at various stages of the process. This includes stakeholders being invited to respond to the Call for Sites process and the involvement of a Panel that provides input to the ELAA methodology and draft iterations of the assessment. This Panel consists of members of the development industry; neighbouring local authorities; and local communities (see Appendix B).

## 2. Methodology

- 2.1 This section sets out the key methodology and locally specific elements applied to this employment land availability assessment. The ELAA has closely followed the guidance provided within the [PPG](#) to inform the methodology and assessment stages and the format of this ELAA (as far as relevant).
- 2.2 Figure 2.1 Below is extracted from the PPG and illustrates the approach which is used for land availability assessments. The following section details the approach to be taken under each step of the methodology.

**Figure 2.1 Land Availability Assessment Methodology Flowchart  
(Extract from Planning Practice Guidance)**

- 2.3 Each sub-heading within the following section relates to corresponding paragraphs within the PPG and sets out how the Council's land availability assessment adheres to guidance.

## Stage 1: Identification of sites and broad locations

### *What geographical areas should the assessment cover?*

- 2.4 This assessment will cover Cannock Chase District, as the plan making area. Where sites cross local authority boundaries, only the part of the site that lies within Cannock Chase District will be assessed. Reference will be made to the cross-boundary nature of the site for completeness.

### *Who can plan makers work with?*

- 2.5 The PPG suggests that land availability assessments should be prepared working with other local authorities within the relevant HMA and FEMA<sup>1</sup>. Alongside this the PPG also states that a range of stakeholders should be involved and be invited to contribute to assessments.
- 2.6 Stakeholders will be able to contribute via the Call for Sites process (see further detail below) and via an invitation to participate in the assessment 'Panel'. The Panel has been established to provide an input into the assessment methodology and provide comments on the draft outcomes of the assessment process (see further details on the Terms of Reference and Panel membership in Appendix B).

### *Can the assessment be constrained by the need for development?*

- 2.7 The PPG states that the land availability assessment will need to identify all sites and broad locations (regardless of the amount of development needed) in order to provide a complete audit of available land. The process of the assessment will, also, provide the information to assist the identification of sites and locations suitable to meet the required need for development in the Local Plan Review.

### *What sizes of site or broad location can be considered for assessment?*

- 2.8 The PPG identifies that plan makers will need to assess a range of different site sizes from small-scale to opportunities for large-scale. The PPG advocates that the land availability assessment should consider all sites and broad locations of 0.25ha (or 500m<sup>2</sup> floorspace) and above.
- 2.9 It is considered appropriate that Cannock Chase's land availability assessment should consider sites below these thresholds to provide a detailed assessment of land availability. This is based upon the manageable number of site submissions to date.

---

<sup>1</sup> HMA – Housing Market Area. Cannock Chase is within the Greater Birmingham and Black Country HMA which includes Birmingham, Bromsgrove, Dudley, Lichfield, North Warwickshire, Redditch, Sandwell, Solihull, South Staffordshire, Stratford upon Avon, Tamworth, Walsall and Wolverhampton.  
FEMA – Functional Economic Market Area. Cannock Chase is within a FEMA with South Staffordshire, Walsall, Stafford and Lichfield

- 2.10 However, there is a judgement to be made in terms of the contribution the particular development makes towards employment generation and land supply which may result in smaller sites ultimately not being included e.g. those involving minor extensions/modifications to existing premises.
- 2.11 All sites and schemes capable of assisting employment generation have therefore been initially considered including:
- New Land and/or comprehensive redevelopments of previously employment generating sites (i.e. demolition and rebuild);
  - Units brought into employment use from non-employment uses;
  - Extensions to premises (where considered not to be minor and to be employment generating); and
  - Refurbishments (where former employment units/sites are being brought back into employment use after long standing vacancies and involve upgrade works).

### ***How can sites/broad locations be identified?***

- 2.12 The PPG provides guidance on how sites should be identified for inclusion within the land availability assessment. This makes clear that plan-makers should not simply rely on sites that they have been informed about, but actively identify sites through the desktop review process. As such, the assessment is not constrained by the employment requirement within the adopted Local Plan, or emerging Local Plan.
- 2.13 The Council has undertaken a desktop review for site identification which has focused in and around all settlements within the District including Cannock, Hednesford and Heath Hayes, Rugeley and Norton Canes, the key rural settlements and other villages with development envelopes defined by the Local Plan. The sources of data for the land availability assessments are covered in further detail below.

### ***What types of sites and sources of data should be used?***

- 2.14 The PPG provides guidance on the sources of data which can be used to identify potential sites through the assessment. As noted above a desktop review has taken place as part of this process drawing upon a range of sources identified in the PPG.
- 2.15 The data is collected from a wide range of sources, as suggested by Paragraph: 011 Reference ID: [3-011-20190722](#) of the PPG including local authority planning records, local and neighbourhood plans, other information held by the authority including that collected through the 'call for sites' (see below), engagement with other public sector bodies, ordnance survey mapping and data, and the desktop analysis.

### ***Can plan makers issue a call for sites and broad locations for development?***

- 2.16 Cannock Chase District Council currently maintains an ongoing [call for sites](#) which is an open process all year round enabling landowners and/or developers to submit information on sites they wish to be considered. New submissions are assessed and included within the ELAA in accordance with the base date of that assessment as set out at paragraph 1.5. A summary of new responses to the Call for Sites is provided at Appendix A.

### ***What can be included in the site and broad location survey?***

- 2.17 The sites included within the ELAA are assessed against national policies and designations to establish those which have a reasonable potential for development and should be taken forward for more detailed site surveys.
- 2.18 Sites have been assessed in greater detail to; ratify inconsistent information gathered through the call for sites and desk assessment; get an up to date view on development progress (where sites have planning permission); obtain a better understanding of what type and scale of development may be appropriate; gain a more detailed understanding of deliverability; any barriers and how they could be overcome; and identify further sites with potential for development that were not identified through data sources or the call for sites.

### ***How detailed does the initial survey need to be?***

- 2.19 The PPG makes clear that site surveys should be proportionate to the detail required for a robust appraisal. The site survey approach and overall land availability assessment methodology is considered to be robust and proportionate. The methodology has been considered by the SHLAA and ELAA Panel and each edition of the ELAA will be considered by the panel prior to its publication.
- 2.20 Cannock Chase in practice take all sites identified within the District forward for the more detailed site survey work to ensure as comprehensive a coverage as possible and given the more manageable number of site submissions to date.

### ***What information should be recorded during the survey?***

- 2.21 The following characteristics<sup>2</sup> will be identified where possible, as per the PPG:
- Site size, boundaries, and location;
  - Current land use and character;
  - Land uses and character of surrounding area;
  - Physical constraints which might include poor access, steep slopes, potential for flooding, natural features of significance, noise from

---

<sup>2</sup> Some of this information is also recorded as part of the Stage 2 assessment process

surrounding land use, location or buildings or pylons, and contamination;

- Potential environmental constraints;
- Proximity to services and other infrastructure, such as public transport;
- Where relevant, development progress for example ground works completed, number of units started/completed;
- Consistency with the development plan's policies; and
- Initial assessment of whether the site is for a particular type of use or as part of a mixed-use development.

## Stage 2: Site/broad location assessment

### *How can the development potential be calculated?*

- 2.22 Site assessments are undertaken in accordance with the guidance contained at stage 2 of the PPG. There are a number of locally distinctive criteria which are incorporated into the assessment when determining the development potential of a particular site. These being the split of uses on site and floorspace to be delivered.
- 2.23 The NPPF and PPG do not provide any categories of sites for employment developments. In recognition of this the ELAA applies locally determined categories, drawing upon local and national guidance, categorising sites as either being 'Readily Available' or 'Not Readily Available' (at present) for the purposes of the assessment. (see [Appendix E](#) for further details).
- 2.24 The employment land target is for uses that the Use Classes Order would generally consider as non-town centre E(g) and B class uses, with flexibility for other employment generating uses where appropriate. Whilst the focus is upon land outside town centres<sup>3</sup> which are more suited to accommodating B class industries and warehousing. Cannock Chase local planning policy recognises that the District's town centres may experience difficulties in accommodating office development specifically, potentially necessitating use of out of town sites. Therefore, a separate category for potential town centre office sites is set out in the ELAA.

### *What factors can be considered when assessing the suitability of sites for development?*

- 2.25 The PPG provides further guidance in relation to assessing the suitability of sites/broad locations for development within the land availability assessments. A site or broad location can be considered suitable if it would provide an appropriate location for development when considered against relevant constraints and their potential to be mitigated. The following paragraphs set out the approach to assessing suitability through the employment land availability assessment.

<sup>3</sup> Economic Development Needs Assessment (April 2019) /Cannock Chase Economic Development Needs Assessment Covid-19 Update (November 2020)

- 2.26 The PPG states that when considering constraints, the information collected as part of the initial site survey, as well as other relevant information, such as those below should be considered:
- National Policy;
  - Appropriateness and likely market attractiveness for the type of development proposed;
  - Contribution to regeneration priority areas; and
  - Potential impacts including the effect upon landscapes including landscape features, nature and heritage conservation.
- 2.27 The assessment of suitability will note the development plan, emerging planning policy (when appropriate) and national policy; a site should be assessed as suitable if it offers a suitable site or location for the specific development type. To assess general suitability, information provided by the site promoters via the call for sites or planning application is drawn upon and cross checked by the Council e.g. by using GIS mapping available on key constraints, site visits and other information where available; including where appropriate any corresponding SHLAA references for sites also being assessed for residential development.
- 2.28 In line with the PPG key national and local policy designations and potential physical/environmental constraints are taken into account along with the site characteristics previously identified in order to inform an overall assessment of suitability (reflecting key local issues).
- 2.29 Regard will also be paid to the overall appropriateness of the site for employment development, taking into account the current land use, surrounding uses and land allocations. Attention will be given to community and industry requirements within the area and to market signals to help inform the most appropriate uses. Taken together these criteria will help determine the suitability of sites and broad locations for employment development and help to identify and significant constraints which mean individual sites are not suitable.
- 2.30 Suitability of a location for employment development can be affected by the following factors: development plan policy and regeneration priorities; market interest; physical problems; infrastructure issues; potential impacts and/or environmental conditions. Where there are no major concerns in relation to these issues then a site can be considered suitable. In addition, a site may be considered suitable if it is within or adjacent to an identified existing employment area and/or there is no alternative potential use by virtue of site-specific considerations e.g. surrounding uses, contaminated land.
- 2.31 Site assessments will be taken on an individual bases and other factors could demonstrate that a site is considered to not offer a suitable location for development irrespective of a perceived alignment with the spatial strategy. This is a high-level assessment of potential key constraints to inform judgements on general suitability, but it is not an exhaustive list. Further

detailed survey work as part of a pre-application/planning application may identify further constraints. Further work will also be required to establish the extent of the impact the identified constraints may have on the scheme, which could be minimal.

- 2.32 Where such constraints apply this will not mean that a site is removed from the assessment, rather that the constraints are recorded. Many of these constraints are potentially readily overcome by appropriate site design, early consideration of the issues in the scheme's development and mitigation measures. In addition, some constraints, can actually be opportunities for the development – for example heritage assets can be used as a key focal point and/or inspiration for site design as well as enhancing wider public understanding of the assets.
- 2.33 The PPG requires local planning authorities to consider constraints, such as Green Belt, when carrying out assessments. It states that the assessment process should reflect the policies in the NPPF which sets out the areas where there would be strong reasons for restricting development (Identified in [Footnote 7 of the NPPF](#)).
- 2.34 The NPPF outlines that in assessing sites against the adopted development plan, regard should be had to how up to date the policies are, the relevance of the constraints and whether such constraints may be overcome. The emerging plan should also be taken into account, when relevant.
- 2.35 Sites will therefore be assessed and categorised with reference to the most recently adopted planning policies, having regard to emerging policies when timely to do so. In general, those development sites that are considered 'Readily Available' on suitability terms benefit from planning permission; permission has recently expired; are the subject of current planning applications or pre-application enquiries; or are identified within the Local Plan as a key location or allocation.
- 2.36 This means that the site constraints including accordance with policy considerations, will have been considered in more detail. These sites will generally have no or only a few constraints and they are ones that can be overcome. They are generally not the subject of 'significant' constraints. However, there may be sites where 'significant' constraints apply but planning permission has been granted following a detailed assessment of the proposals. In these cases, such sites can be considered 'Readily Available'.
- 2.37 'Significant' constraints as set out in the [NPPF Footnote 7](#) and other locally relevant designations as identified in the combined list below will be considered as part of site suitability. Sites that are wholly affected by the following constraints will not be considered suitable for development (unless planning permission has been granted);
- Green Belt (including Safeguarded Land);
  - Area of Outstanding Natural Beauty (AONB);
  - Ancient Woodland;

- Scheduled Monuments (SM);
- Special Areas of Conservation (SAC);
- Sites of Special Scientific Interest (SSSI);
- Local Nature Reserves (LNR) and Sites of Biological Importance (SBI);
- Regionally Important Geological Sites (RIGS);
- Flood Zone 3;
- Where development would involve the total loss of a designated heritage asset e.g. demolition of a listed building;
- Local Green Spaces; and
- Green Space Network sites, unless evidence demonstrates their loss is in accordance with the criteria set out in Policy CP5 of the Local Plan (Part 1).

- 2.38 Where portions of the site are affected by such designations this will be noted and the site will be assessed accordingly. Where planning permission has been refused then sites are categorised accordingly and the site specific constraints that have resulted in the refusal of a planning application (e.g. access) will also be considered ‘significant’ at this stage, unless there is evidence that they can be overcome in the future.
- 2.39 Key re-occurring constraints in the District are the Green Belt and AONB designations. Therefore, where the over-riding ‘significant’ constraint is one (or both) of these designations, the site will be categorised within a separate ‘Green Belt and AONB’ section.
- 2.40 Sites classed as ‘Not Readily Available’ at present are split further to identify those sites that lie within the Green Belt and/or AONB which are being actively promoted, and then those sites that are considered ‘Not Readily Available’ for other reasons e.g. physical site constraints that affect suitability, or they are not being actively promoted for development.
- 2.41 A summary of how sites will be assessed in relation to their suitability and subsequent ELAA site categorisation (based on suitability alone i.e. whilst a site may be ‘suitable’ it may not be ‘available’, resulting in an alternative ELAA site categorisation), can be found in Appendix E.

**To be clear the ELAA takes a ‘policy off’ approach, as such, although a site may be assessed as available within this assessment this does not, and should not, be considered as suggesting the site would be allocated or achieve planning permission as policy constraints are not considered as part of the assessments.**

***What factors can be considered when assessing availability?***

- 2.42 The PPG provides guidance on how the availability of a site should be considered through the land availability assessment. A site can be considered

available when a developer or landowner has expressed an intention to develop. The assessment of availability has been informed by correspondence with landowners/developers, including their assessment as to when the site could be developed, and consideration of the current planning status of the site. Where a site has planning consent it is generally considered 'available' unless information indicates otherwise. This approach is consistent with the PPG.

- 2.43 The previous planning history of the site is also considered for example where there is evidence of non-delivery of a number of planning consents in previous years this may require further investigation to determine if the site is truly available, including correspondence with the landowner/developer. Where sites are occupied by existing uses, the need to relocate that use and the time it would most likely take to relocate have been considered.
- 2.44 A summary of how sites will be assessed in relation to their availability and subsequent ELAA categorisation (based on availability alone i.e. whilst a site may be 'available' it may not be 'suitable', resulting in an alternative ELAA categorisation), can be found in Appendix E.

***What factors can be considered when assessing achievability including whether development is viable?***

- 2.45 A site will be considered achievable for development where there is reasonable prospect of the particular type of development being developed on the site at a particular point in time. This is a judgement about the economic viability of a site as if a development opportunity does not realise a viable return on investment, it is very unlikely the site will be brought forward for development.
- 2.46 The District Council has and will update viability evidence to support the progression of the Local Plan and the Community Infrastructure Levy (CIL). The most recent studies from 2014 demonstrated this issue in relation to non-residential schemes. Viability considerations have therefore principally drawn upon the continued availability of the site (e.g. marketing, planning permissions) and evidence of recent developments as well as supporting information from the site promoters where available. This approach is consistent with the PPG.

### Stage 3: Assessment Review

*Please note that the following two stages correspond to stages 4 and 5 of the PPG methodology. Stage 3 of the PPG relates to the windfall assessment stage which is not used within this ELAA.*

- 2.47 Following the completion of the site assessment the findings will be presented to illustrate the development potential of the sites considered through the ELAA (see [section 3](#) of this document).
- 2.48 The outcome of the ELAA illustrates the level of available employment land bearing in mind the policy off approach of the assessment. The assessment of a site does not and should not be considered as suggesting the site would be allocated or achieve planning permission.

#### ***What happens if the trajectory indicates there are insufficient sites/broad locations to meet need?***

- 2.49 This stage involves considering the identified supply against assessed needs. Should the assessment review conclude that there are insufficient sites to meet the development needs of the plan, the PPG suggests the assessment should be revisited with consideration of some of the assessments assumptions on development potential including physical and policy constraints, and where further site options should be investigated to meet any shortfall identified; monitored through the Authority Monitoring Report (AMR).

### Stage 4: Final Evidence Base

- 2.50 The Core outputs are presented in [section 3](#) of this document. The standard outputs of the assessments will be as described within the ELAA (in line with the PPG). Sites will be identified within sections of the final assessment document based on 'Readily Available' and 'Not Readily Available' at present. The categories within the Cannock Chase ELAA are further detailed at Appendix D.
- 2.51 The preparation and publication of the ELAA enables a clear base for the monitoring of employment land provision against the requirements set within the Local Plan. The ELAA will be updated and published annually (with data to March 31<sup>st</sup>). Previous editions of the ELAA will remain available upon request so that progress of the supply and sites can be viewed across editions of the document.

### 3. Final Evidence Base for Cannock Chase District

- 3.1 The full results of the assessment can be found at Appendix F which provides a comprehensive site list with commentary against each site. It also provides an analysis of the total supply and completions to date.
- 3.2 The results of the assessment identify that there is currently around 18ha of 'Readily Available' employment land across the District. There is approximately 7.7ha available at Cannock, Hednesford and Heath Hayes; 9.4ha at Rugeley and Brereton; and 0.7ha at Norton Canes. The main focus of this availability in terms of employment locations is Towers Business Park, along the A5 Corridor and at Norton Canes Business Area.
- 3.3 The majority of 'Readily Available' supply is located within existing employment locations. These are largely 'good' or 'average' quality locations (As set out in the Existing Employment Areas Assessment 2019) with 13.15ha (73.75%) being within existing good quality locations.
- 3.4 The size of available sites ranges from less than 0.1ha to around 4ha with the most common size of sites available being the below 1ha range. The around 18ha of 'Readily Available' supply largely consists of comprehensive redevelopment sites which can cater for new bespoke schemes. The land available is split between being primarily for E(g)/B2 uses (30%) and E(g)/B2/B8 uses (34%).
- 3.5 There is around 140.86ha ha of land which is classed as 'Not Readily Available' at present. A large portion of this total is made up of Green Belt sites (127.61ha – of which 25.3ha is located at Kingswood Lakeside). Some of these sites are not being proposed for E(g)/B class employment uses but are included within the assessment for completeness and monitoring of non-E(g)/B class use employment proposals.
- 3.6 There are some sites which have previously been considered 'Readily Available' but due to changed circumstances are now considered 'Not Readily Available – Restricted and Excluded' i.e. operations on site have changed meaning a proposed redevelopment is now not likely to come forward in the medium-longer term.
- 3.7 Completions from 2006-2023 totals 78.42ha and they have been focused at the existing employment locations of Kingswood Lakeside, Towers Business Park, and along the A5 Corridor. Again, completions are dominated by new land schemes (80%). In terms of the types of development, completions by E(g)/B2/B8 uses represent 33% together, with limited B2/B8 uses. Mixed E(g)/B8 use schemes represent 26% of completions. Schemes involving non-B class uses account for 7% of completions to date.
- 3.8 Completions for 2022/2023 total 0.85ha and have occurred at Kingswood Lakeside, Walsall Road and the A5 Corridor. The annual rate of provision over

the plan period to date is slightly above the Local Plan target range (4.6ha) delivered against a target of 4ha per annum.

- 3.9 Table 3.1 below summarises the current available supply and completions against the Local Plan (Part 1) targets for employment land provision.

**Table 3.1 Employment Land Supply**

	<b>All Sites (ha)</b>	<b>New Sites * (ha)</b>	<b>Redevelopments* (ha)</b>
Completions 2006-2020	78.42	62.70	<b>15.72</b>
Readily Available Supply <ul style="list-style-type: none"> <li>• Outstanding (Under Construction)</li> </ul>	17.83 (3.43)	2.77	<b>15.05</b>
Total Supply (2006-2028)	96.25	65.47	<b>30.77</b>
Less Local Plan Part 1 Target (2006-2028)	88	-	-
Balance	8.25	-	-
Land 'Not Readily Available'	<b>140.86</b>	-	-

\*See Appendix D for definitions

- 3.10 There is currently a surplus of 8.25ha in providing for the Local Plan (Part 1) target.
- 3.11 There is potential for further provision in land considered 'Not Readily Available', however much of this (127.61ha) is subject to the Green Belt and AONB policy constraint. There are some brownfield, urban sites which may be suitable for E(g)/B class uses (e.g. CE42) but there is uncertainty as to their availability. It is noted that approx. 2.83ha of land at Cannock (Site CE63) is also being promoted for reallocation to residential development through the Local Plan Review, the emerging Local Plan currently has no weighting, and the site is not currently under planning application for residential development, as such it is considered there is no evidence provided to alter the assessment for the time frame of this ELAA.
- 3.12 Nevertheless, this may necessitate further flexibility within the employment land supply. Timescales for the delivery of site RE3 (2.1ha) may also be impacted by redevelopment plans for Rugeley Power Station. In relation to town centre offices, there continue to be a number of sites to be monitored as part of sequential test requirements and the Town Centre Redevelopment Plans, however these are limited.
- 3.13 The Local Plan (Part 1) employment land target is a gross target which factors in the need to replace losses of employment land. Monitoring via the Council's AMR (2022) and ELAA (2023) identifies that the rate of losses is in line with

the expected rate which informed the Local Plan (Part 1) target (circa 1ha per annum of losses assumed). Ongoing monitoring of losses will continue to inform this and any necessary policy response.

## 4. Key Conclusions

- 4.1 This ELAA (2023) has identified that there is currently a surplus of 8.25ha of available employment land against the Local Plan (Part 1) target of providing for at least 88ha of new and redevelopment employment land (2006-2028).
- 4.2 Trends indicate that Mixed E(g)/B2/B8 and E(g)/B8 developments have dominated the local employment land provision in recent years, reflecting changes to the employment structure locally and nationally. There have been a number of larger scale E(g)/B8 warehouse-led developments, particularly at the very good employment location of Kingswood Lakeside and the good employment location of Towers Business Park.
- 4.3 There is a mixture of available sites in terms of size and potential employment use. Supply is currently largely available within good/average quality existing employment locations that have the potential to accommodate bespoke new developments. However, it is noted that supply at the very good/good quality employment locations of Kingswood Lakeside and Towers Business Park will be limited upon the completion of currently under construction sites, meaning that the employment land supply will be more reliant upon average quality employment locations (and smaller individual development sites), with the exception of the employment land coming forward at Rugeley Power Station.
- 4.4 This supply should be kept under review to ensure that the employment land target continues to be met and that there is continued availability of a range of employment land sites (particularly those which can provide very good/good quality employment land opportunities). Those sites currently classed as 'not readily available' should be facilitated to come forward where required (and appropriate) in the context of existing, and reviews of, Local Plan policies. There are a number of brownfield and urban sites to consider further to contribute towards the current land supply. However, a significant proportion of the currently unavailable supply is restricted by Green Belt and AONB policy, which would require consideration via the Local Plan review.

## Appendix A: Responses to Call for Sites 2023

Respondent	Comments	CCDC Officer Action

## Appendix B: ELAA Panel

### **Cannock Chase District Council (CCDC) & Lichfield District Council (LDC)**

### **Strategic Housing Land Availability Assessment (SHLAA) and Employment Land Availability Assessment (ELAA) Panel (LAA Panel)**

#### **Terms of Reference**

##### **Context**

The Land Availability Assessment Panel (LAA Panel) is to assist in the production and annual revision of a robust SHLAA and ELAA for both Cannock Chase and Lichfield District Councils (The Councils). The LAA Panel will add value to the Land Availability Assessment (LAA) process through the skills, expertise and knowledge of the Panel members.

##### **Purpose/scope**

- To assist in the production of a robust SHLAA and ELAA for The Councils by helping to achieve agreement on the methodology for the LAA's;
- To share information and intelligence on market conditions and viability in relation to housing and employment developments;
- To consider and give advice on the findings of the assessments undertaken by The Councils and to help come to a view on the suitability, deliverability and developability of sites including consideration of site constraints;
- To act as an independent body that is representative of key stakeholders/sectors for the sole purpose of the preparation of the LAA's; and
- To undertake any other tasks agreed with the Panel for the purposes of preparing the LAA reports.

NB – The Panel is not asked to agree the methodology/approach, content or conclusions of the five year housing land supply element of the assessments.

##### **Operational matters**

- The Councils will facilitate and chair LAA Panel meetings;
- Membership of the Panel will be undertaken on a voluntary basis and the Councils will not be liable for expenses incurred during the LAA processes;
- The Panel will have regard to current Government practice guidance on Land Availability Assessments.
- Panel members are to act as an independent representative of their sector as a whole and not just the interests of a particular individual or organisation. No commercial or other advantage will be sought by Panel members. Panel members are required to declare any interest they may have on a site when contributing toward its assessment and will not be expected to advise on areas outside of their experience;
- Panel members will be provided with a confidential draft of the SHLAA and ELAA prior to their formal publication by the Councils which shall remain confidential until published by the relevant local authority. Panel members will not seek to gain advantage by having seen the confidential draft reports. Panel

members will be invited to comment on and agree to the LAA's prior to their formal publication by the relevant Council. Comments received will be included within an appendix or addendum to the respective LAA along with a response from the Council. Where a Panel member does not agree with an element of the LAA they will be expected to provide justification for this disagreement and the issues will be set out within the same appendix together with a Council response. Where there is no conclusion on any matter, the Council will reserve the right to publish the final LAA;

- The names and contact details of Panel members will be recorded and relevant information will be made available when requested;
- Panel members will be encouraged to send a suitable substitute in the event they cannot attend a Panel meeting and may call additional people to assist them in Panel work outside of meetings (e.g. checking site information etc). Any additional people used will work within this TOR; and
- The SHLAA and ELAA data bases will remain the property of the respective Councils, who will be responsible for changes to the databases and assessments as a result of Panel discussions.

### **Panel membership**

- Membership of the panel is voluntary and Panel members may leave the panel at any time by informing the Councils. In such circumstances replacement Panel members may be sought through any appropriate avenue;
- A reserve list of potential replacement panel members will be maintained at the discretion of the Councils; and
- The Councils will seek to ensure the Panel membership is balanced and reflects a range of stakeholders/sectors in line with Government practice guidance. The Panel will consist of, where possible, representatives from the local authorities (The Councils), local agents, developers and others with property interest/knowledge within the area. Members may include representatives from;
  - Cannock Chase District Council and Lichfield District Council;
  - The development industry (both in terms of residential and employment development);
  - Planning consultants (of varying sizes) active in the local area;
  - The land promotion sector (both in terms of residential and employment development);
  - The Statutory Consultees (Environment Agency, Historic England & Natural England);
  - Other Local Planning Authorities (including South Staffordshire District Council, Tamworth Borough Council and Stafford Borough Council).

### 2023 ELAA Panel Members

Organisation
Bromford Housing- <i>Registered Social Housing Provider</i>

Cannock Wood Parish Council – <i>Local Authority</i>
First City – <i>Planning Agent</i>

## Appendix C: ELAA Panel Responses on Draft ELAA

Panel Member	Summary of Responses	CCDC Officer Response and Action
RPS	Paragraph 2.7 - caveat contradicts the underlying purpose of land availability assessments as stated in the PPG.	Comment noted. Wording altered.
RPS	<p>RPS welcomes paragraph 2.11 the inclusion of site comprising land that could facilitate comprehensive redevelopments of previously employment generating sites, as well as extensions to premises. RPS contends that in the context of employment it is a more effective use of land to direct additional growth to those sites in existing employment use.</p> <p>RPS would suggest it is the location and relationship to existing employment that is more important than size and which should be a key criteria for the assessment.</p>	<p>Comment noted. No changes made.</p> <p>The current approach is based on guidance provided within the PPG, and that CCDC has the capacity to consider smaller sites than the PPG threshold as part of the assessment.</p> <p>It is identified within the ELAA whether a site sits within an EEA.</p>
RPS	<p>Paragraph 2.22 - recommendation of an additional criteria focusing on the relationship of land to existing employment uses.</p> <p>This broadly aligns with the PPG and the use of emerging policy as a guide for measuring development potential of a particular site, which RPS suggest should include land proposed for release from the Green Belt.</p>	<p>Comments noted. No changes made.</p> <p>It is identified within the ELAA whether a site sits within an EEA.</p> <p>See below comments.</p>
RPS	<p>Paragraph 2.35 - there is a clear risk here that the emerging strategy and strategic policies could be applied in an arbitrary manner without proper regard to the emerging evidence base that will underpin the Local Plan Review. The PPG actually goes further stating that in the first instance strategic policy-making authorities will need to revisit their assessment, which could include changing assumptions about the development potential of particular sites.</p> <p>In this context, RPS recommends that the ELAA methodology is mended to properly reflect the advice in the PPG on assessing suitability so that future need for employment is taken into account, rather than simply focusing on constraints identified under current adopted policy.</p>	<p>Comments noted. No changes made.</p> <p>The ELAA is reflective of the current adopted Local Plan, this was determined in consideration that the eLP has not advanced within the ELAA 2023 monitoring period, amendments have not been made at this time to reflect the eLP this will continue to be monitored through the 2024 monitoring period and suitable adjustments made accordingly.</p> <p>Under the current adopted plan requirements, the ELAA maintains a surplus of Employment Land against the adopted Local Plan Employment Need of 88ha. It is not considered that a 'revisit' is required at this time as a Local Plan Review is being undertaken concurrently.</p>

		<p>A separate Site Selection Process has been undertaken as part of the Local Plan Review to where sites within the Green Belt have been considered - the SHLAA has provided information to this process but has not been used as an absolute for decision making purposes.</p> <p>The ELAA itself does not form part of the site selection process, it forms a database of all known potential development sites.</p>
RPS	<p>Paragraph 2.49 - The ELAA states that where insufficient sites have been identified to meet objectively assessed needs the PPG suggests the assessment should be revisited.</p> <p>RPS would suggest it is reasonable that consideration be given to the release of land within the Green Belt to meet identified needs. The advice in the PPG should be reflected on in the ELAA Methodology.</p>	<p>Comments noted. No changes made.</p> <p>See above comments.</p>
RPS	<p>Stage 4: Final Evidence Base - Table 3.1 explains that there is a surplus against the adopted Local Plan Part 1 employment land target.</p> <p>Little recognition is given in the ELAA to the emerging Local Plan review which will roll toward the future employment land target to 2040. The assessment of suitability of sites should be considered through the ELAA in the context of the emerging need for employment land and the likelihood that additional employment land will be required to meet employment need over the longer term.</p>	<p>Comments noted. No changes made.</p> <p>The ELAA is reflective of the current adopted Local Plan target of 88ha, as such consideration is not given at this time to the eLP period of 2018-2040, as the eLP has not advance within the ELAA 2023 monitoring period, amendments have not been made at this time to reflect the eLP period and will continue to remain under review for the ELAA 2024 monitoring period.</p>

## Appendix D: Notes to Employment Land Availability Assessment

### *Definition of Developable Areas (by development types)*

- D.1 Standard 'Developable Area' definition: the amount of land that is available for development, including on site landscaping and infrastructure to support the specific scheme within its boundary e.g. car parking and on-site access roads.
- New Land/Comprehensive redevelopment (i.e. demolition and rebuild) - see standard 'Developable Area' definition. Where small scale employment developments (circa 500m<sup>2</sup> or less) are included as part of wider mixed use scheme then include floorspace/immediate site area only.
  - Units brought into employment use from non employment uses- see standard 'Developable Area' definition.
  - Refurbishments- see standard 'Developable Area' definition. If refurbishment to main building is minor and extensions form main part of works then should be classed as 'extension to premises' instead (see below).
  - Extensions to premises- floorspace/immediate site area only (unless additional parking etc forms part of works then include additional infrastructure as per standard 'Developable Area' definition).
- D.2 Bespoke open storage yard proposals will be treated on their merits dependent upon the extent of structural changes on site. Whilst it is recognised that these can be employment generating sites the often large-scale level of land take for open storage purposes only could result in the artificial skewing of employment land provision targets. It is considered that these proposals differ to that of B8 storage facilities as by their nature they do not often provide buildings (with associated landscaping and services etc) which could be made available for future use and thus add value to the local economy by contributing to portfolio of properties for occupation. It may therefore be appropriate to only count the contribution of any new buildings/landscaping provided on site. However, where open storage is proposed as ancillary to a development then this is included as per the standard 'Developable Area' definition.

### *Definition of Previous Use Categories*

- D.3 This identifies the nature of the site, primarily whether it is Greenfield or Brownfield. This draws upon previous sub-regional monitoring and previous regional monitoring classifications. Sites are classed as follows:
1. Greenfield/Not previously developed
  2. Greenfield/Re-use of agricultural building
  3. Brownfield/Redeveloped from industry/employment
  4. Brownfield/Redeveloped from other (e.g. restored from open cast coal mining)

D.4 In determining the proportion of developments that have come forward on ‘new’ land this refers to categories 1 and 4 (with judgements to be made on category 2). ‘Redeveloped’ land is therefore primarily classed as category 3, with some developments in category ‘2’ potentially also forming part of this dependent upon their nature.

### ***Definition of Employment Land Portfolio***

D.5 This identifies the characteristics of a site utilising a classification system previously used by former sub-regional monitoring. Sites are classed as follows:

1. Regional Logistics Site
2. Major Investment Site
3. Regional Investment Site
4. Sub-Regional Employment Site
5. Good Quality Employment Site
6. Other Local Site

D.6 In the Cannock Chase District context, categories 4-6 are applicable and have been interpreted as follows:

- Sub-Regional Employment Site- high quality attractive sites, generally 10-20 hectares in size in sustainable urban locations. Should be suitable to attract clients with an international/national/regional choice of location. Would usually need to be located on or have a direct link to the strategic highway network be, or proposed to be, well served by public transport.
- Good Quality Employment Site- good quality sites most likely suitable for locally based investment and/or with potential for regional investors, likely to exceed 0.4 hectares. May include larger sites located further from the strategic highway network.
- Other Local Site- land likely to be of interest to local investors only. Likely to be small and suitable for ‘marginal’ activities.

D.7 The Council will keep under review the appropriateness of these classifications. In determining the classification of the site regard has also been paid to its location i.e. what existing employment area it is within and the quality of that area (see below).

### ***Definition of Existing Employment Areas/Quality***

D.8 The Cannock Chase Existing Employment Areas Assessment (2019) identifies the various employment locations across the District. It assesses their quality and potential for continued employment use to inform policy responses in the future. Where a site is located within an existing employment location then that is recorded. Please see the Existing Employment Areas Assessment (2019) for full list and quality appraisals of employment locations.

***Definition of Centre/Edge of Centre/Not in Centre***

D.9 This identifies the location of the site in relation to the District's town centres (Cannock, Rugeley and Hednesford). Regard has been paid to town centre boundaries (as identified in Local Plan Part 1).

***Definition of Short/Medium/Long Term***

D.10 For all other sites without planning permission, consideration will be given as to the likely delivery timescales of each site. This will give a broad location as to whether the site would come forward in the short term (1-5years), medium term (6-10years) or longer term (11 years or over).

## Appendix E: Cannock Chase – Summary of Suitability and Availability Assessments

**Table E.1: Summary of Suitability Assessment**

<b>Suitability</b>	<b>Level and type of constraint</b>	<b>Planning status evidence</b>	<b>ELAA Site Category</b>
<b>Suitable (YES)</b>	No/minimal policy, physical or environmental constraints identified, or constraints have been overcome i.e. via detailed planning permission	Planning permission granted/no planning permission but subject of planning application or pre application discussions Key location/allocation in Local Plan	Readily Available (within short-medium term)
<b>Suitable (YES)</b>	Minimal/some policy, physical or environmental constraints identified, but not significant and evidence they can be overcome e.g. via appropriate layout (or constraints have been overcome i.e. via detailed planning permission)	Subject of pre-application enquiries Key location/allocation in Local Plan	Readily Available (within medium-long term)
<b>Not Suitable (NO)</b>	Green Belt/AONB significant constraint applies and is the over-riding significant constraint	No planning permission/planning permission refused (note may be subject of pre application discussions but until permission is granted, remain subject to Green Belt/AONB constraints)	Not Readily Available (Green Belt and AONB)
<b>Not Suitable (NO)</b>	Significant policy, physical or environmental constraints (other than Green Belt/AONB policy apply e.g. flood risk)	No planning permission/planning permission refused	Not Readily Available (Restricted and Excluded sites)

**Table E.2: Summary of Availability Assessment**

<b>Availability</b>	<b>Planning status and/or correspondence evidence</b>	<b>ELAA Site Category</b>
<b>Available (YES)</b>	<p>Detailed planning permission granted.                      Outline planning permission/permission in principle granted and/or Local Plan key location or allocation with no planning permission (where supported by additional evidence of delivery).                      Reserved matters applications.                      Discharge of conditions applications.                      Starts on site including land preparation works.                      Correspondence with developer/landowner                      Sites that are currently the subject of planning applications.                      No planning permission but landowner/developer expressed interest and site subject of more detailed pre application discussions.</p>	Readily Available (short-medium term)
<b>Available (YES)</b>	<p>Local Plan key location or allocation with no planning permission (where no evidence of delivery in short term).                      No planning permission but landowner/developer expressed interest e.g. call for sites, Local Plan representations.                      Correspondence with developer/landowner</p>	Readily Available (medium-long term)
<b>Available (YES)</b>	<p>Sites within the Green Belt/AONB being actively promoted                      No planning permission but landowner/developer expressed interests e.g. call for sites, Local Plan representations, pre application discussions.                      Sites that are currently the subject of planning applications.</p>	Not Readily Available (Green Belt and AONB)
<b>Available (NO)</b>	<p>No recent interest expressed by landowner/developer (typically within last 5 years) e.g. call for sites, Local Plan representations, pre application discussions                      Expired planning consents that have not been taken forward (typically within last 3 years) and no further interest expressed by landowner/developer.</p>	Not Readily Available (Restricted and Excluded)

**GREEN BELT AND AONB SITES**

**CANNOCK, HEDNESFORD AND HEATH HAYES**

-	CE17	Kingswood Lakeside Extension 1	1	3.8	-	400314	307982	NO	YES	1	Yes	4	Kingswood Lakeside/Very Good	Not Centre	E(g)/B2/B8	3.8	-	-	-	-	Sole landowner promoting site, not developer. Public owned land (Staffordshire County Council). Green Belt. Shape and levels of site could restrict full development of the site. Site size reduced to reflect that northern area is reserved for high quality landscaping. Flood Zones 2 and 3 runs alongside western site boundary. Coal Authority High Risk Development Area. Proximity to AQMA.
-	CE18	Kingswood Lakeside Extension 2	1	21.5	500000	400255	308701	NO	YES	1	Yes	4	Kingswood Lakeside/Very Good	Not Centre	E(g)/B2/B8	21.5	-	-	-	-	Sole landowner promoting site, not developer. Public owned land (Staffordshire County Council). Site is restored former opencast mining area. Represents greenfield land. Green Belt. Extended site area enables potential access from Blakeney Way, reducing potential access issues. Overhead powerlines cross site. Topography may restrict full development of the site. Drainage runs across site. Coal Authority High Risk Development Area (owner states 12ha of site is affected by the geotechnical legacy of the former coal mining operation). Adjacent to SBI. Proximity to AQMA. Feasibility works underway. Market interest expressed in expansion of Kingswood Lakeside area. The site has been identified for potential employment allocation in the ongoing Local Plan Review.
-	CE19	Site between A5 and M6 Toll	1	9.4	-	399276	308110	NO	NO	1	Yes	-	-	Not Centre	E(g)/B2/B8	9.4	-	-	-	-	Sole landowner promoting site, not developer. Public owned land (Staffordshire County Council). Green Belt. Possible highway constraints as access would be directly off A5 (Trunk Road). Site since assessed further via landowner (County Council) investigations into feasibility of development. Not currently considered viable (in longer term) due to number of constraints including access, ground conditions, and other environmental features. Coal Authority High Risk Development Area. Historic Landfill. Flood zones 2 and 3 to southern area of site. Hatherton Branch canal safeguarded route runs via site. Proximity to AQMA.
-	CE54	Former Severn Trent Plc Land, Wedges Mills	1	2.3	-	396996	308782	NO	NO	3	Yes	5	A5 Corridor/ Good	Not Centre	Mixed	2.3	-	-	-	-	Greenbelt policy, access issues, Flood Zones 2 and 3 cover site. Potential contamination (former effluent lagoon). Proximity to AQMA. Hatherton Branch canal safeguarded route runs via site. Cross boundary site with South Staffordshire- total site area is approx 7.4ha. Removal from the Green Belt was suggested in site allocations (site 14). Also suggested for residential use- SHLAA ref C119. Considered significantly constrained by flood Zone 3 which covers whole of site in CCDC area.
