

CANNOCK CHASE COUNCIL

CULTURE & SPORT SELECT COMMITTEE

5 SEPTEMBER 2006

REPORT OF THE HEAD OF CULTURE & MAJOR PROJECTS

PLAYING PITCH STRATEGY

1. Purpose of Report

1.1 To propose the publication of and consultation on the draft Playing Pitch Strategy.

2. Recommendations

1.2 That Members note the draft Playing Pitch Strategy for Cannock Chase District and recommend to Cabinet:-

(a) That the Playing Pitch Strategy be approved for consultation.

(b) That a report be submitted to a future meeting of the Culture & Sport Select Committee and Cabinet to consider the consultation responses and proposals for the finalisation and adoption of the above strategy.

3. Key Issues

3.1 In February 2004, Strategic Leisure Ltd. was appointed to produce a Playing Pitch Assessment and Strategy.

3.2 A report was produced in September 2004 using the methodology recommended by Sport England.

3.3 The report produced 22 recommendations relating to strategic planning, facility development and sports development (Annex D).

3.4 The PPG17 work that was produced has been reviewed and updated with a new strategy being produced (Annex A).

3.5 An up to date audit of current facilities that are available throughout the district has been undertaken (Annex B).

3.6 The work undertaken through the audit, the original Playing Pitch Strategy and the updated document has produced an action plan to address the issues raised (Annex C).

4. **Consultation Framework**

4.1 It is proposed that consultation be carried out with:-

- Staffordshire County Council
- Sport England
- West Midlands Arts Council
- Local Organisations and Groups
- Local Sports Council
- Norton Canes Recreation Ground Charity
- Cannock Public Recreation and Pleasure Ground Charity
- Playing Fields Association

In addition a copy will be made available for local libraries, Council's Offices and on the Council's website for a six week period. After the consultation has ended the representations received will be considered and reported back to the Select Committee, including suggested amendments to the strategy as appropriate. It is then intended that the Select Committee would recommend to Cabinet that the document will be formally adopted.

Section 1

Background

In February 2004 Strategic Leisure Ltd. were appointed to undertake a Playing Pitch Assessment and develop a strategy for the district.

This work was completed in accordance with the guidance document "Towards A Level Playing Field: A Guide To The Production Of Playing Pitch Strategies" published by Sport England and the Central Council for Physical Recreation (CCPR) in October 2002.

The rationale for undertaking the Study is to identify current levels of provision in the area, across the public, educational, voluntary and commercial sectors, and to compare this with current, and likely future levels of demand. The supply and demand analysis will help identify the need for new pitch facilities, and also suggest where there are too many facilities, perhaps in the wrong location, or the wrong type of facilities to meet current demand. The analysis will help to underpin future planning policy and allocations and help to support bids for external funding.

Section 2

Details of Matters to be Considered

- Recommendations produced from the original work undertaken by Strategic Leisure at Annex D.
- The action plan and priorities at Annex C.
- The consultation framework at paragraph 4 in the covering report.

Section 3

Contribution to CHASE

The playing pitch strategy will contribute to all of the objectives identified under the CHASE acronym:-

Culture & Sport

Health

Access to Skills

Social Inclusion

Environment

Social Inclusion: Pitches can relate to community identity, be a focus for local sporting activity, and encourage "collective" effort.

Community Involvement: Through providing local venues for sports teams who in turn can create or strengthen community identity and enhance the social fabric of the area. Success in local leagues by local teams can also create local pride.

Community Strategy: Strong anecdotal evidence exists to show that sport has a part to play in preventing crime. Indirectly sport can have an impact by providing challenge and adventure, and giving meaning and a sense of purpose to young people's lives. Ensuring that facility provision meets local needs is important in ensuring that sport fulfils its potential.

Lifelong Learning: Many important social attributes can be learnt through pitch sports. Young people can develop a range of skills and attributes ranging from risk-taking through to social and behavioural skills.

Healthy Living: The health benefits of participation in sport are well documented. Facility provision is important in ensuring that effective development work can take place.

Section 4

Section 17 (Crime Prevention) Implications

The creation of strategically placed facilities will allow for future Sports Development activities and the development of more teams to help create more diversionary activities for children and young people.

Section 5

Human Rights Act Implications

There are no identified implications in respect of the Human Rights Act arising from this report.

Section 6

Data Protection Act Implications

There are no identified implications in respect of the Data Protection Act arising from this report.

Section 7

Risk Management Implications

Cannock Chase Council does not currently have an adopted playing pitch strategy.

The risks associated as a result of not having an adopted strategy are:

- Difficulty in prioritising any future facility development or provision
- Difficulty in making any future investment decisions.
- It will also be extremely difficult, if not impossible, to attract any external funding without an adopted playing pitch strategy.

The risks of adopting the strategy are:

- Any future decisions on the disposal of council pitches could attract negative publicity and public opinion.

However this risk could be managed and the impact minimised by:

- promoting the positive impact of being able to concentrate resources and offer better value for money;
- investing in the improvement of the existing pitches and offering new changing rooms and car parking.

Once the actual strategy has been subject to consultation it will be necessary to undertake a more complete risk management assessment and include this in any future reports.

Section 8

Legal Implications

Section 19 of the Local Government (Miscellaneous Provisions) Act 1976 empowers the Council to provide recreational facilities, including outdoor pitches for team games, within the District. It may make these facilities available to such persons as it thinks fit either with or without charge.

However, in order to ensure that appropriate facilities are being provided and current demands are being met, it is considered good practice to develop strategies based on an assessment of current provision and need. The current strategy which is proposed for consultation will provide the Council with that strategic guidance in relation to playing pitches.

The Council is the corporate trustee for two recreational ground charities – the Norton Canes Recreation Ground Charity and the Cannock Public Recreation and Pleasure Ground Charity. In so far as proposals in the Strategy impact on these two Charities, then it will be necessary to consult with the Charities and obtain their consent to any proposals.

Section 9

Financial Implications

There are no direct financial implications as a result of this report. However, after consultation, and when the action plan has been approved, there will need to be a full Capital needs evaluation together with resourcing statement and also an assessment of additional revenue implications of pitch, changing room and car park maintenance. These will need quantification in monetary terms as to feasibility.

Section 10

Human Resource Implications

There are no direct human resource implications as a result of this report.

Section 11

Conclusions

Having an adopted playing pitch strategy for the District will allow for a planned and co-ordinated approach to the future development of pitches and facilities.

Annex A – Playing Pitch Strategy

Annex B – Facilities Audit

Annex C – Action Plan

Annex D – Original Recommendations from Strategic Leisure

ANNEX ACANNOCK CHASE COUNCILPLAYING PITCH STRATEGYINTRODUCTION

1. In February 2004, Strategic Leisure Ltd was appointed to produce a Playing Pitch Assessment and Strategy. A report was produced in September 2004. The methodology used was that recommended by Sport England. It assessed the provision and need for football, cricket, hockey and rugby union.
2. The report concluded with recommended standards of provision for each of the sports and identified where there was an excess or shortfall of provision. It also identified where the quality of provision needed to be improved.
3. A series of 22 recommendations (Annex C) were made with regard to strategic planning, facility development and sports development.

POSITION STATEMENT

4. The assessment shows that there is an excess provision of senior football pitches. These are mostly provided on local authority sites. There is however, a shortage of junior and mini pitches. The peak demand is on Sunday mornings and the table below summarises the peak demand and supply of pitches in the original assessment and the predicted minimum number required to meet the Strategy. The revised assessment shows that there is currently space for even more pitches, particularly on school sites.

	Number of Games	Number of pitches	Surplus/Deficiency	Number of Pitches
Mini soccer	11	7	-4	15?
Junior Football	12	10	-2	16?
Senior Football	21	48	+27	25

5. The assessment shows that there is an excess provision of senior football pitches. These are mostly provided on local authority sites. There is however, a shortage of junior and mini pitches.
6. The quality of pitches is generally average to poor. The lack of adequate changing rooms is one of the main issues. The size of some of the senior pitches is less than ideal and better suited for junior or mini pitches. These factors therefore tend to concentrate demand on the small amount of good quality provision.
7. Where local authority sites contain just one pitch, they are costly to maintain and rarely have changing rooms. Many are best suited for lease to the voluntary sector or to close and relocate unless part of a site with other leisure uses.
8. What the assessment did not show is that there are large areas of playing fields currently unused, particularly on school sites. Few schools hire their pitches out for community use because of the increased costs in maintenance and the need to manage sites for changing.

9. Cricket is provided by the voluntary sector. The largest club (Cannock Cricket Club - CCC) is just outside the District boundary but draws participants from the District. Provision for cricket in schools is poor due largely to the very high costs of maintaining quality pitches for both play and practice.
10. There is only one community based rugby club in the District which plays at Hagley Park. Cannock Rugby Union Football Club has a ground outside the boundary but as with Cannock Cricket Club, draws participants from the District.
11. There is no hockey provision in the District although the Cannock Club, just outside the boundary has 3 pitches. Only one of these is suitable for club competitions although schools in the District do use one of the others. There are concerns about the long term viability of these pitches. There is a sec 106 agreement in place with funds to provide a full-size artificial turf pitch (ATP) for hockey and/or football in Cannock and there could be funds available from a sec 106 agreement to extend the current half size ATP at Rugeley Leisure Centre to full-size.

THE STRATEGY

12. A Playing Pitch Strategy can take a number of forms. It is proposed that the following is adopted.
13. The Strategy should be guided by a series of Strategic Policies. These will identify objectives and link the Strategy to wider corporate policies. They will also ensure that the provision of pitches is driven by need, demand and sports development strategies. A number of draft policies are submitted for discussion.
14. The key element of the Strategy is the Strategic Programme. This will state the priorities for provision in the future and the pathways to achieving the programme. It will look at the resources necessary and means to achieve the levels of investment required. This is likely to involve the sale of existing playing fields to ensure the implementation of the Strategy. The Programme will have time related targets and must be realistic, achievable and viable over the longer term. Again, a draft programme is submitted for discussion.
15. The final part of the Strategy is the Action Plan. This will identify specific sites with proposals for their development or change. As this will affect individuals, clubs and communities, a site development and management plan should be produced for each which will be subjected to full consultation.

DRAFT STRATEGIC POLICIES

General

16. The Council will seek to ensure a fair and equitable access to good quality facilities across the District.
17. As a first priority, facilities will be provided and maintained to meet existing expressed demand.
18. Sports development plans will be drawn up and implemented to increase participation in pitch sports within achievable objectives given resources available.

19. New and improved facilities will be provided to meet predicted demand from sports development initiatives.
20. The location of facilities will be identified and developed to provide long term sustainable provision that is within accessible travel time depending on the type of usage and users.
21. The Council will support the development and maintenance of facilities wherever they contribute to the community strategy whether they are in public, education or voluntary control. This support will be in the form of finance, equipment, technical contribution management or planning obligations.
22. Planning policies will be developed and implemented that will ensure that new building developments contribute financially to the capital development and maintenance of facilities.

Sports

23. A District Football Development Group wide ranging representation will be established with the initial objective of producing a Development Plan within 6 months to inform the facility needs and for priority implementation.
24. The Council will work with Secondary Schools and Cannock Hockey Club to investigate proposals for the use of a minimum of two ATPs to be developed in the District. These will be compatible with the facilities at the Cannock Hockey Club. The objective is to produce a Hockey Development Plan within the next 3 years.
25. The Council will work with the cricket clubs that serve the District, all schools and County cricket development groups to determine the long term facility and development needs of the sport.
26. The Council will work with the rugby union clubs that serve the District, relevant schools and the Rugby Football Union to determine the long term facility and development needs of the sport.

STRATEGIC PROGRAMME

Pitch Provision

27. The following football pitch programme is subject to the outcome of the Football Development Plan.
28. Over the next 5 years a minimum of 3 football development centres will be established within the District with a spatial distribution providing good access to as high a proportion of residents as possible. These centres would meet the following criteria:
 - Capacity to provide grass pitches for senior, junior and mini-soccer
 - Capacity to provide training facilities, both indoor and floodlit outdoor
 - Capacity to provide good quality changing rooms

- Adequate capacity for car parking
 - Commitment to provide on site management and quality maintenance.
29. Senior soccer pitches provided by the local authority will be concentrated on multi-pitch sites where quality changing and sustainable maintenance can be provided. Specific single pitch sites will be identified and maintained. Investment will prioritise the provision of good quality changing rooms and pitches that can be maintained to a good standard in a sustainable manner. Provision should meet current demand with space for a 20% increase in demand. The Action Plan will prioritise this part of the Programme
30. Junior soccer pitches will be provided on secondary school sites or on Council owned sites where dimensions are too small for senior pitches. Partnerships will be developed with key schools to ensure investment in the provision and maintenance of pitches, equipment and changing rooms. Priority schools will be identified and agreed within the next year.
31. Three sites will be identified and developed into mini-soccer centres in the next 3 years of which one will be in Rugeley. A further two sites will be reserved for development in the future should demand increase. These sites could be on local authority or school land and will meet the following criteria.
- Capacity for a minimum 6 pitches
 - Secured environment
 - Minimum opportunities for dog fouling
 - Access by pedestrians and cycles
 - Adequate capacity for car parking
 - Pavilion for management and adult waiting / refreshments
 - Commitment to provide on site management and quality maintenance.
32. Artificial Turf Pitches will be provided in Rugeley and Cannock for community football and hockey programmes, with the possibility of extending provision to the Hednesford area.
33. Multi-use games areas (MUGA's) will be provided where there is clear demand for casual use which cannot be provided on existing provision or is compromising the quality of existing provision.

Surplus Provision

34. The playing fields of primary schools will be mainly for school use with some out of school activities involving school pupils. Some larger sites may be identified for community mini soccer in the short or longer term. Where a primary school closes, the sale of the playing fields for development will be acceptable in terms of playing field requirements provided it is not identified as a community mini-soccer facility and the whole of the receipts from the sale of this land are used to:
- Ensure that local primary schools have adequate playing fields,
 - Assist in the implementation of this strategy,
 - Assist in the implementation of the Leisure Strategy for the District.

35. All secondary schools have some potential for community use. Where playing fields on secondary school sites are shown to be surplus to requirements as defined in the playing pitch assessment and other planning policies allow development, then the whole of the receipts from the sale of this land must be used to provide community sports facilities in the District.
36. Where privately owned land that is currently or has formerly been used as playing fields and is shown to be surplus to requirements as defined in the playing pitch assessment, then their sale for development purposes will be acceptable in recreation terms provided a sec 106 agreement is entered into that;
 - Assists in the implementation of this strategy,
 - Assists in the implementation of the Leisure Strategy for the District.
37. The level of funding provided from this agreement will reflect the size and location of the lost playing fields, the equivalent cost of providing alternative provision to a minimum specified standard even if this is not the use to which the funds are put.
38. There is clearly a surplus of provision within the public sector. The priority will be the implementation of this strategy which involves the generation of capital to affect improvements and the ability to sustain the long term maintenance. The means of achieving this is not just a rationalisation of provision but a major reorganisation. This will inevitably involve the sale of some playing fields where the net gains substantially exceed the loss.

Notes to accompany action plan

- (1) Work is currently being undertaken to produce a football development plan in consultation with all interested parties throughout the district. Initial views are pointing towards the development of local mini and junior football leagues to support adult leagues.
- (2) Several council pitches are currently not used and there is the potential to either dispose of these sites and use any receipts to support the action plan, or seek alternative recreational use of them.
- (3) The option here is to negotiate with the County Council to bring Hagley Playing fields back into use for pitches, to compensate for the potential loss of the adult pitches at Green Lane, and to use Rugeley Leisure Centre for car parking, changing and showers.

To also negotiate with the County Council and local schools for the use of school sites for mini and junior football pitches.

- (4) These are two sites, Norton Canes and Laburnum Road, that would benefit from Multi Use Games Areas; due to the current levels of use of the existing fields.
- (5) Heath Hayes Park, Hednesford Park and Hagley Park Playing fields will be the main sites for adult football, this will need to be confirmed through the football development group. Changing accommodation and car parking will need to be addressed with Heath Hayes being the priority site. Hagley Park Playing fields also has the potential for further expansion if demand increases (CCC own a piece of land adjacent to the fields)
- (6) Two council sites have been identified as mini soccer sites, Cannock Park and Green Lane. Both sites have changing accommodation but car parking at Green Lane will need to be addressed. Cannock Park car parking can be accommodated at Chase Leisure Centre. Mini soccer will not become an issue until local leagues are established and this is a component of the work that will be undertaken by the development group. Funding will also be necessary for equipment and storage.

Priorities

1. Produce Football Development Plan
2. Enter into negotiations with County Council and local schools for use of their pitches
3. Agree sites for disposal
4. Identify funding for:
 - car parking and changing accommodation at Heath Hayes
 - car parking at Green Lane
 - equipment and storage accommodation for mini soccer sites
 - purchase and installation of new adult and junior football goals
 - survey of pitches for ground works to improve quality and ongoing revenue for improved maintenance
 - improved maintenance of any additional sites that are brought into commission for community use
 - revenue cost for the hire/lease of any additional sites that are not in council ownership
 - creation of a Football Development Officer to drive the actions that identified in this report and also the Football Development Plan
5. Review of the current Section 106 funding policy to support the funding to priorities for investment.

ANNEX DOriginal Recommendations from Strategic Leisure**Strategic Planning Recommendations****Strategic Planning – Recommendation 1**

Seek to use the planning policy process to prioritise facility development and future provision in line with the identified priorities in this strategy e.g Use priorities for investment identified as a guide for Section 106 funding, the existing policy of developer contributions needs reviewing and consideration needs to be given to a threshold of contributions from the construction of a single dwelling

Strategic Planning – Recommendation 2

The Playing Pitch Assessment data should be updated on an annual basis and a repeat of the strategy development undertaken every 5 years. Annual updating should include repeating quality inspections to monitor changes to quality of pitches

Strategic Planning – Recommendation 3

Promote the overall value and benefits of playing pitch provision, and its contribution to open space in the local area. Ensure that the “dual” function of playing pitches and their value as part of the District Council’s stock of Green space is within a wider Green Space Strategy for the District as part of the Council’s response to Planning Policy Note 17 (PPG17). An overarching Green space Strategy is being produced in parallel to this strategy and is vital in assessing the role and value of all Green space across the District. In some cases assessment of informal open space may identify potential sites for formal playing pitch development.

Strategic Planning – Recommendation 4

The Council should consider the development of a Soccer Task Force, and local sports development groups established for Rugby League and Cricket to identify issues with facilities. In the case of football, the task force should be used to prioritise the needs for investment and which clubs need support to progress to charter status. The same should apply to the other sports development groups.

Strategic Planning – Recommendation 5

Through the Cannock Chase District Council Sports Development Team, the Council should liaise with neighbouring authorities regarding new pitch developments in areas close to the Cannock Chase District Council border to assess the likely impact in supply and demand

Strategic Planning – Recommendation 6

Through Cannock Chase District Council Leisure Services liaise with neighbouring authorities regarding pitch hire charges to ensure that fees and charges are comparable.

Strategic Planning – Recommendation 7

Investigate, in consultation with teams, the introduction of pitch hire charges that reflect the quality of pitches, charging less for provision rated lower

Strategic Planning – Recommendation 8

Seek to work with local schools to develop and promote sport and explore the opportunity for wider access to facilities by the community.

Strategic Planning – Recommendation 9

Review the current Section 106 funding policy to enable the redirection of funding to priorities for investment e.g. changing accommodation, and drainage

Facility Development**Facility Development – Recommendation 1**

Seek to improve the overall quality and quantity of existing and new ancillary accommodation with particular emphasis on the need to provide adequately for juniors and women, girls and disabled users. This needs to be done in accordance with the identification of priorities for investment and improvement. In line with Child Protection Guidance, it is important to ensure that facilities can also be segregated to accommodate male and female, junior and senior sports teams.

Facility Development – Recommendation 2

Prioritise investment in ancillary facilities on key multi pitch sites as a more economical use of resources, particularly in relation to ancillary facilities through the development of a priorities for investment.

Facility Development – Recommendation 3

The Council should, through the sports development groups e.g: Soccer Task Force, Cricket action group, work with clubs with an interest in leasing recreation grounds from the Council in order to develop their club further.

Facility Development - Recommendation 4

Ensure that where provided, informal kick about areas (5-a-side pitches) are maintained and adequately provide for informal play – this is to ensure that informal use of formal pitches is kept to a minimum in order to sustain quality

Facility Development – Recommendation 5

Linked to the review of leisure facilities, ensure that there is adequate access to floodlit training facilities to support the overall development of pitch sports at local level

Facility Development – Recommendation 6

The Council should continue to improve the quality of all its sports pitches and try to increase the current level of investment in pitch renovation and improvements to ancillary facilities

Facility Development – Recommendation 7

The Council should assess the extent of Dog fouling on playing pitches and introduce measures to keep pitches free from dog fouling.

Facility Development – Recommendation 8

A full sized Synthetic Turf Pitch needs to be developed to provide as a training venue for the promotion of Football, Hockey, Cricket and Rugby within the District. The half sized STP at Rugeley needs to be developed further to facilitate Football and Hockey training opportunities.

Sports Development**Sports Development – Recommendation 1**

Team Generation Rates (TGR's) should be used as a benchmark for future measurement and monitoring of sports participation within the boroughs. They should be used to prioritise sports development focus particularly in those pitch based sports that are not occurring within the District Boundaries e.g Hockey. The aim should be to work with clubs to bring opportunity to participate locally through the provision of a Council Synthetic Turf Pitch

Sports Development - Recommendation 2

Through the Cannock Chase District Council Sports Development team, team generation rates (TGR's) in the Cannock Chase District Council Borough should be compared with those in surrounding boroughs to provide an indication of levels of participation. This comparison can be used to develop county wide priorities for future sports development initiatives and external investment

Sports Development – Recommendation 3

An increase in Sports development staff is needed if Sport is to be adequately resourced and developed within the District Boundaries

Sports Development – Recommendation 4

There is an over reliance on external funding to deliver sports development programmes, the Council should look to more creative uses of internal funding streams to promote sport e.g. through a more flexible approach to Section 106 funding.

Sports Development – Recommendation 5

Club development needs to be increased and the Council should aim to have 3 clubs per year reach charter status.
