Introduction

The Local Facilities Study aims to provide an assessment on a selection of the local services and facilities that are sited within the different settlement areas of Cannock Chase District Council. The study will inform the decision making process and support the policy documents that make up the Cannock Chase Local Plan.

The survey work for the Facilities Study was originally carried out during Summer 2012 by the Planning Policy section of Cannock Chase Council and published in December 2012. It consisted of desk based research and local knowledge. The facilities included are those identified from the research at that time and those updated in September 2016. Some are likely to change over time – through losses or new additions in other areas. The research is limited to the information known at the time of the study and might not contain all existing facilities within the District.

Facilities have been deliberately omitted from the study in some cases to avoid duplication, where they have already been assessed in other studies. For example sport and leisure facilities are featured in alternative studies contained within the Local Plan Evidence Base.

Policy Context

The **National Planning Policy Framework** (March 2012) states that the planning system provides a social role by providing accessible local services that reflect the community's needs and support its health, social and cultural well-being. Planning should deliver sufficient community and cultural facilities and services to meet local needs.

In town centres there should be a range of suitably allocated sites for cultural and community developments. In rural areas planning policies should support the retention and development of local services and community facilities including local shops, meeting places, sports venues, cultural buildings, public houses and places of worship.

To deliver the social, recreational and cultural facilities and services the community needs, planning policies and decisions should plan positively for their provision, guard against the loss of facilities, allow the sustainable development of existing facilities, and ensure that community facilities are integrated within housing and economic developments.

The **Cannock Chase Local Plan (Part 1) 2014** contains a range of policies to support the retention and development of local facilities including:

- Policy CP4 (Neighbourhood – Led Planning) enables local groups/people to plan what they would like to see in their own neighbourhoods
- Policy CP5 (Social Inclusion & Healthy Living) includes the provision of health, education, community, local shopping and place of worship facilities amongst others.
- Policy CP9 (A Balanced Economy) supports sustainable transport links, nurseries and other social infrastructure.
- Policy CP10 (Sustainable Transport) also supports the retention and development of sustainable transport modes.

Methodology

The assessment process contained several distinct stages in the formulation of the local facilities study.

Stage One – Area Search

Stage one involved defining how the search areas within the District Council area would be divided up to best reflect the settlements within the Council boundaries. The District is a mix of urban areas with merged boundaries that have grown towards each other over time, distinct towns and small villages. After considering various options (e.g. Ward, Settlement or Parish boundaries) the District was split along Parish Boundaries where possible with two exceptions. Non - parished areas (Cannock/Chadsmoor and Rawsley) and Parishes with more than one distinct settlement within their boundaries (Slitting Mill/Rugeley, Heath Hayes/Wimblebury, and Norton Canes/Churchbridge) have been divided into separate units to fit each settlement contained within them. The search areas are defined as:

- Cannock (southern part of non-parish area containing Cannock Town Centre)
- Chadsmoor (northern part of Cannock non-parish area)
- Hednesford (Parish area)
- Rugeley (Parish area excluding Slitting Mill)
- Slitting Mill (S.W. part of Rugeley Parish)
- Norton Canes (Parish area excluding Churchbridge)
- Churchbridge (western part of Norton Canes Parish)
- Heath Hayes (western part of Heath Hayes and Wimblebury Parish area)
- Wimblebury (eastern part of Heath Hayes and Wimblebury Parish area)
- Brereton (Brereton and Ravenhill Parish area)
- Bridgtown (Parish area)
- Hazelslade, Rawsley & Prospect Village (non-parish area)
- Brindley Heath (Parish area)
- Cannock Wood (Parish area)

Stage 2 – Data Collection

Stage two involved the consideration of the data required for the study. This included facilities data already held by the Planning Department and other useful data that could be obtained from other organisations including the County Council. Additional data was sourced from alternative sources including maps and site visits. The data collected and used included:

- Banks
- Bus Routes
- Cash Machines
- Children's Centres
- Churches
- Community Centres
- Doctors Surgeries
- Libraries
- Petrol Stations
- Post Boxes
- Post Offices

- Primary Schools
- Secondary Schools
- Shopping Centres
- Telephone Boxes

Stage 3 - Publication

The collected data has been published in a simple table summary format and also by area in order to provide an easy to read record of the facilities present in each area of search.

Local Facilities by Area
